

# Passengers and movements at Brussels Airport

The number of passengers at Brussels Airport rose by 6.4% to 23,610,856 passengers in 2024. This represents 89.6% of the pre-COVID level in 2019. In contrast, the number of passenger flights (i.e. movements) rose by only 4.3%, remaining at 80.8% of the pre-COVID level. This is mainly due to higher load factors and the use of larger aircraft.
